

# A Decade of Progress...

Vista Automation is the leading Industrial Automation Solutions provider offering services in the Middle East region and covering wide range of applications and processes including Oil & Gas, Utilities, and Manufacturing.

We offer turnkey integrated PLC/SCADA based solutions as well as DCS based solutions for discrete, batch, and continuous processes. We distinguish ourselves by providing well-engineered solutions with significant focus on the software development and testing.

## Message from the Board of Directors

We've passed a milestone and we're celebrating.

It is Vista Automation's 10th anniversary and on behalf of the Board of Directors I would like to take this opportunity to extend my gratitude to all of you for being a part of this journey.

Vista Automation has been evolving with steady and healthy growth in revenue, manpower, customer base, and geographical coverage. With success story after another; our team continues to gain the trust of our clients, expanding our reach to various industries, verticals, and applications. Our quality-driven approach to providing Industrial Automation Solutions coupled with distinct focus on the software development and testing along with the outstanding after-sales support have given Vista Automation an edge granting us repetitive and new business.

To our team both current and former; without you Vista Automation would not have reached where we are today. Every one of you plays a very important role in the company's development. Thank you for your dedication, loyalty, and commitment.

To our clients; Vista Automation is grateful that you have entrusted us to provide our solutions and services. Your demands, challenges, and feedback have been a source of enthusiasm and are pivotal for our development. With your support, we intend to explore new heights to meet and exceed your expectations in the upcoming years.

Ammar Hammad  
Director

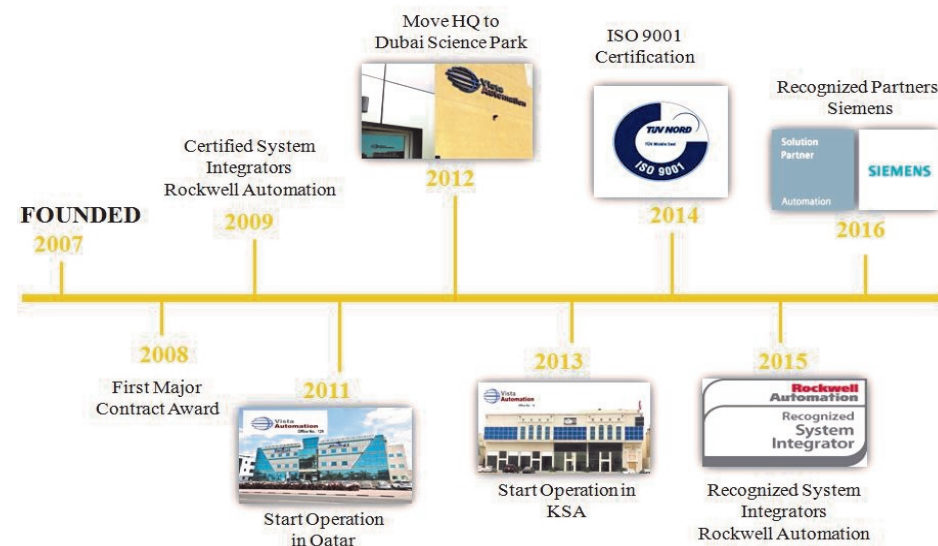

## How it all began

What began in 2007 as a small company with just 4 members has risen up to stand tall amongst others. Almost nine months into the startup we secured our first major contract: providing turnkey instrumentation and control (I&C) solutions for the Dubai Investment Park District Cooling Plant. Two months later, Vista Automation was awarded another major contract to provide the same solution for the Abu Dhabi Reem Island District Cooling plant.

From there Vista Automation has continued to develop reaching to where we are today. 10 years later we are stronger than ever; and still moving ahead on steady foundations built on a wide base of satisfied clientele and the support of our technology partners and vendors.

These two major contracts along with other small contracts carried us through the 2008 financial meltdown before we were able to win our then largest contract to provide the Plant-wide SCADA Integration at the newly constructed Emirates Aluminum Smelter in September 2009.

## Our Journey to 10 years

## Key Awards

- Dubai Investment Park District Cooling Plant 3
- Emirates Aluminum Plant-wide SCADA Integration Phase 1&2
- Habshan to Fujairah Crude Oil Pipeline
- Qurraya IPP Turbine Inlet Air Cooling
- SABIC Rubber Plant Refrigeration System

- Occidental of Oman Water Treatment Plant at Safa Field
- Occidental of Oman Gas Lift Compressor ESD/F&G system
- Sea Water Intake Pumping Station
- Lusail City RO Plant
- Madinah Hajj City Utility Plants and Central Command and Control

## What's next?

Vista Automation has successfully grown over the past 10 years and we are planning to maintain this steady growth in the years to come. Achieving the longest reference list in the market we have built a very strong name and reputation in the Power & Water sector including the District Cooling, Turbine Inlet Air Cooling, Pumping Stations, and Water & Waste Water Treatment Plants. We have also successfully completed projects in other verticals including Oil & Gas, Petrochemicals, and Infrastructure.

The theme of our growth for the next five years will be geared towards providing solutions that help our clients to improve the efficiency of their facilities; reduce the operation cost, and lengthen life cycle of the installed equipment. The focus of our growth will be on providing on-line monitoring solutions that collect data from the process and the equipment and provide analysis tools and dashboards to help the development of more economical operation practices and preemptive maintenance schedules.

Vista Automation will continue to honor its core corporate values that are based on conducting clean and ethical business practices, keeping the customer at the center of attention, and maintaining sustainable business based on strong relationship with our customers and vendors.
